

Application of: Arthur Kammeijer
Serial No.: 10/019,510
Date Filed: December 21, 2001
Page 2

AMENDMENTS TO THE SPECIFICATION:

Please amend page 19, line 20 - 28 as follows:

-- Concentrations of trans-UCA and hydrogen peroxide were largely increased, as was the UV exposure, to obtain larger amounts of UCS photo-oxidation products as collected fractions from the reversed phase column for further analysis. A typical chromatogram is shown in Fig. 4. Four finally selected for identification (peak A, 1-3 in Fig. 4). Prior to analysis, tetrabutylammonium was removed by solid phase extraction on C₁₈ silica. --
